

Melting Point Apparatus LZ-MPA-A101

www.labozon.com | info@labozon.com

Overview

Melting Point Apparatus LZ-MPA-A101 is a visual melting point apparatus with desktop design and delivers reliable performance. The temperature control range is from 6 to 100°C and offers semi-automatic detection method. It showcases features like TFT Touch Screen LCD Display, Peltier temperature control technology that realize the high

precision temperature control, and taking high-definition video with convenient and clear observation of the whole process of sample melting. Used for measurement of the melting point of medicines, dyes and organic, chemical and other crystalline substances to determine purity. Measurement method is in conformity with the standard of pharmacopoeia. It measures four samples at the same time and calculate average value of initial and final melting points automatically.

Specifications :

Temperature control range	6 to 100°C
Detection method	Semi-automatic
Capacity per batch	2pc./batch
Temperature resolution	0.1°C
Temperature gradients	(0.1 to 10.0)°C/Min
Temperature accuracy	±0.3°C
Repeatability	0.1°C/Min, ±0.1°C
Camera & Video	Camera & Video
Video playback	YES
Operator account	8
Result storage	400
SD card capacity	8G
Display	TFT Touch screen
Interface	USB RS232 SD card Ethernet
Opening capillary size	I.D>1.0 mm, O.D.1.4 mm Double opening

Power consumption	120 W
Power supply	110 to 220 V, 50/60 Hz
Dimension	400 × 280 × 330 mm
Weight	5 kg

Features :

1. TFT Touch Screen LCD Display
2. High automatic integration, to achieve a key measurement function
3. Peltier precise temperature function technology
4. Semi-automatic detection method
5. High-definition video instead of traditional visual microscope recording
6. Designed with international and ISO in the determination of the melting point of oils and fats
7. Measures four samples at the same time
8. Automatically calculate average value of initial and final melting points

Applications :

Melting Point Apparatus used in chemical, pharmaceutical, textile, food and dye, petrochemical industries for determining melting point of different material intended for quality checking and research experiments.

Labozon Scientific Inc. 100 Pearl St, Hartford, CT 06103, United States.
